

Convenient and cost-effective training for CAD Professionals

4D Design Solutions has assembled a team of instructors with real life expertise integrating, supporting and customizing Autodesk-based solutions for civil, architectural and manufacturing users; and has created the first in-depth compilation of Computer Based Training (CBT) CD's.

Developed by industry experts with over 20 years experience, each course curriculum is created and delivered by real-life CAD professionals. The CBTs combine an easy-to-use interface with real classroom exercises. Visually follow along with step-by-step tutorials on your screen while the instructor's voice adds detail and clarity to each lesson.

Special Features of 4D's Computer Based Training CDs include:

- Keyword Search for specific lessons
- Shorter topical lessons allow you to use CBTs for reference and helpdesk activities
- Sort lessons by skill level -- Beginner, Intermediate, Advanced
- Online testing by title and administrative reports available
- Use with your PC, or load onto your company network or intranet for use by your entire design team!

Available Computer Based Training Series CD's:

- AutoCAD Series
- Land Desktop Series
- Mechanical Desktop Series
- Architectural Desktop Series
- Independent Series
