Synergis Engineering Design Solutions Restructures to Expand its AEC Offerings for Customers

Quakertown, PA, March 20, 2007 —The Synergis Engineering Design Solutions Division of Synergis Technologies, Inc. announced today that it is combining its Building Solutions and Infrastructure Solutions groups to form the Architecture, Engineering and Construction (AEC) Solutions team and making significant investments to bring additional expertise to the team. These moves are part of its ongoing effort to improve the level of service, value and overall quality experience it provides its customers.

As part of the formation of the new group, Synergis Engineering Design Solutions is also announcing today the promotion of Tamara Healy to Director of Sales and Marketing for the AEC and Government Solutions team. As a degreed Civil Engineer, she brings more than 15 years of unique industry experience to the position. Previous positions with Raytheon E & C, the US Army Corps of Engineers, and Pfizer in engineering design, project management and sales have helped solidify Healy's value as a trusted resource to Synergis Engineering Design Solutions customers. Healy manages a team of eight professionals, including five Regional Account Managers and three Customer Support Personnel. Synergis Engineering Design Solutions has also created a new position, Customer Advocate, to ensure that customers have a favorable working relationship and open line of communication with Synergis Engineering Design Solutions. Cheryl Shepper, formerly of Synergis EDS' Infrastructure Solutions team, has moved into that role. Five Solutions Engineers complete this expanding team, with open positions listed at http://www.synergis.com/files/synergis/synergis_careers.shtml

In addition to its dedicated AEC staff, Synergis Engineering Design Solutions offers its AEC customers five training center locations including Center City Philadelphia, Quakertown, Blue Bell, and York in Pennsylvania as well as Marlton in New Jersey.

“Training allowed us a focused approach to learning what to do and not to do with our new software,” said John Tully, CAD Manager at Gilmore & Associates. “I’ve had dealings with other Autodesk resellers during my career and by far, Synergis offers the quickest response, widest variety of services and expertise. I would recommend them to anyone.”

“Holding the position of the leading Autodesk VAR in the Mid-Atlantic region for more than 20 years, we are making the necessary strategic investments to structure ourselves and deliver the quality results our customers have come to expect,” said Kristen Tomasic, vice president, Synergis Engineering Design Solutions Division. “Our customers in the AEC market have literally changed the landscape of our region through their innovative design. We are looking forward to continuing our partnership as we help them meet their design, implementation and business objectives.”

About Synergis Engineering Design Solutions

Synergis’ Engineering Design Solutions, an independent division of Synergis® Technologies, Inc., is a leading Autodesk® Value Added Reseller for Manufacturing, Infrastructure, and Building Solutions in the Mid-Atlantic region. Headquartered in Quakertown, Pennsylvania, it is also recognized as an Autodesk® Premier Solutions Provider (PSP), Manufacturing Specialist, Autodesk’s highest level of authorization. The Engineering Design Solutions Division provides companies in Manufacturing, Government, AEC, and related industries the best quality Autodesk software, training, professional services, and support to ensure their maximum productivity, competitive business advantage, and return on investment. As an Autodesk® Authorized Training Center, Synergis provides onsite customized and classroom training at five convenient locations, taught by Autodesk Certified Experts.
