Synergis Engineering Design Solutions' Robert Reid Becomes a Certified Autodesk Inventor Expert

Quakertown, PA, August 22, 2007 — Synergis Engineering Design Solutions, a division of Synergis Technologies, Inc., today announced that Bob Reid, a Synergis Solutions Engineer, has been named as an Autodesk Inventor Certified Expert. Building on the company's wealth of expertise Reid has become the fourth person of the Synergis Engineering Design Solutions team who successfully completed the rigorous Autodesk Inventor Certified Expert course and exam, validating his extensive knowledge of the application and obtaining Autodesk's highest credential as an Autodesk Inventor software expert.®

Reid has been striving to achieve expert status from the time he joined Synergis Engineering Design Solutions less than a year ago. His first accomplishment was earning Autodesk Inventor "Certified User" status—a prerequisite to attaining the "Certified Expert" status—earlier this year. Now, just five months later, he has met his personal goal of being named an Autodesk Inventor certified expert. Reid adds this honor to his extensive background of industry experience, a degree in Mechanical Engineering Technology and over 23 years in industrial machine design.

"I truly admire Bob for his drive to pass this difficult exam just 10 months after joining Synergis Engineering Design Solutions. It's not easy and truly tested his abilities with the application," said David Sharp, President and Chief Executive Officer of Synergis Technologies. "This phenomenal accomplishment confirms the first class personnel on staff at Synergis, and the high level of expertise we offer to our valued customers. Our manufacturing customers who are moving to Autodesk Inventor with the help of our experts surely stand to benefit."

About Synergis Engineering Design Solutions

Synergis Engineering Design Solutions, an independent division of Synergis[®] Technologies, Inc., is a leading Autodesk[®] Value Added Reseller for Manufacturing, Infrastructure, and Building Solutions in the Mid-Atlantic region. Headquartered in Quakertown, Pennsylvania, it is also recognized as an Autodesk[®] Premier Solutions Provider (PSP), Manufacturing Specialist — Autodesk's highest level of authorization. The Engineering Design Solutions Division provides companies in Manufacturing, Government, AEC, and related industries the best quality Autodesk software, training, professional services, and support to ensure their maximum productivity, competitive business advantage, and return on investment. As an Autodesk[®] Authorized Training Center, Synergis provides onsite customized and classroom training at five convenient locations, taught by Autodesk Certified Experts.
