Synergis Engineering Design Solutions Training Helps James R. Holley & Associates Streamline Processes from Days to Hours

Quakertown, PA, April 19, 2007 — Synergis Engineering Design Solutions, a division of Synergis Technologies, Inc., announced today that James R. Holley & Associates, Inc., a full service Pennsylvania civil engineering firm serving residential, industrial and commercial land developers, chose Synergis Engineering Design Solutions for training and support for Autodesk Civil 3D software. This helped the company transition from Autodesk Land Desktop to Autodesk Civil 3D software to stay at the forefront of technology and streamline processes, dramatically reducing the time to complete key tasks from days to just hours.

“The sheer time savings we realized by moving to Civil 3D from Land Desktop was remarkable,” said Rick Graham, CAD manager, James R. Holley & Associates, Inc. “The customized training done at our site was great and was a perfect introduction to the software. We’re still early in our pilot project phase and we’ve already experienced productivity increases and streamlined engineering processes. We know there are even more benefits to come.”

James R. Holley & Associates is a repeat customer, looking to Synergis Engineering Design Solutions for all of its Autodesk design software purchase and training needs. “Our experience with Synergis Engineering Design Solutions has been positive. The enthusiasm of their staff is infectious. They sincerely enjoy passing their knowledge onto us and have genuine concern for our company’s success,” said Graham. “The level of support we presently have with Synergis Engineering Design Solutions is

invaluable to me. And, our success as a company would not be complete without assistance from them.”

Before formal training, the designers at J.R. Holley made due with help files, tutorials and other online resources. “Since our training session, there is solid Civil 3D understanding among the engineers and a strong level of confidence in their ability to manipulate the software to their advantage. With this new proficiency, the company is seeing great improvements in their capabilities, productivity and success,” said Bill Frederick, the Synergis design applications engineer and Autodesk Civil 3D implementation certified expert who lead J.R. Holley and Associates’ training.

Synergis Engineering Design Solutions hosts learning events throughout the year to help companies better understand how to maximize their Autodesk investment through education and customized programs. The company boasts a pedigreed group of software and industry experts who teach classes. Classes are purposely small with only up to eight students enrolled to ensure personal attention and can be held onsite at a host company or Synergis facilities.

About Synergis Engineering Design Solutions

Synergis’ Engineering Design Solutions, an independent division of Synergis® Technologies, Inc., is a leading Autodesk® Value Added Reseller for Manufacturing, Infrastructure, and Building Solutions in the Mid-Atlantic region. Headquartered in Quakertown, Pennsylvania, it is also recognized as an Autodesk® Premier Solutions Provider (PSP), Manufacturing Specialist, Autodesk’s highest level of authorization. The Engineering Design Solutions Division provides companies in Manufacturing, Government, AEC, and related industries the best quality Autodesk software, training, professional services, and support to ensure their maximum productivity, competitive business advantage, and return on investment. As an Autodesk® Authorized Training Center, Synergis provides onsite customized and classroom training at five convenient locations, taught by Autodesk Certified Experts. For more information on the Engineering Design Solutions Division, visit www.synergis.com or call 800-836-5440.
