Synergis Engineering Design Solutions Hones Focus on Professional Services with Promotion of Mark Mahovich

Mahovich promoted to senior director of professional services

Quakertown, PA, March 6, 2008—To amplify their already high-level of customer services and unique programs, Synergis® Engineering Design Solutions, a division of Synergis Technologies, Inc., today announced that Mark Mahovich, a long-time Synergis Engineering Design Solutions manufacturing solutions expert, has been promoted into a newly-created leadership position as senior director of professional services. In this role, Mahovich has direct responsibility for the company's service offerings for the building, academic, manufacturing and infrastructure solutions divisions. He will use his deep understanding of customer needs to ensure the company develops programs that continually meet those needs, delivered through training, implementation, consulting, assessments, process audits, and data management consulting services for each engineering discipline. In addition, Mahovich will lead Synergis Engineering Design Solutions training, support and solutions professionals to make certain Mid-Atlantic engineering professionals who come to Synergis Engineering Design Solutions have a first-class experience that helps them improve upon their business processes and competitive advantage.

"As we look to the future, it has become clear that to truly expand our service offerings according to the needs and wants of our customers, we had to create this strategic role to focus on our goals and steer us in the best direction for the benefit of our customers," said Kristen Tomasic, vice president of Synergis Engineering Design Solutions. "Mark is a tremendous asset to our company. He has a great understanding of Synergis and a deep intimacy with our customers. His passion for

serving our customers and making sure we are serving them appropriately is of vital importance and is a great advantage for all of us. Mark is a true leader and a great role model. In this customer advocacy role, he will ensure we deliver unique programs and services that continue to delight our customers.”

With his nearly 20 years of engineering experience, and a 10-year history with Synergis, Mahovich is a natural fit for this key strategic leadership position as the senior director of professional services. Mahovich joined Synergis in 1998 as a Mechanical Solutions engineer and took over as the director of Manufacturing Solutions in late 2001. During that time, he earned significant professional recognitions including being among the first to become an Autodesk Inventor certified expert and a Manufacturing Solutions implementation certified expert. Prior to joining Synergis Mahovich worked at American National Can Co. on numerous projects where he was responsible for reducing spoilage and increasing the efficiency of several manufacturing facilities across North America. Mahovich is a graduate of Penn State University with a bachelor of science in Mechanical Engineering.

About Synergis Engineering Design Solutions

Synergis' Engineering Design Solutions, an independent division of Synergis® Technologies, Inc., is among the most elite of the Autodesk® Value Added Resellers for Manufacturing, Infrastructure, and Building Solutions. Synergis Engineering Design Solutions holds privileged recognition as an Autodesk® Premier Solutions Provider (PSP), Autodesk's highest level of certification, for the expertise, training and services it provides for the manufacturing, civil engineering and academic communities. Companies in manufacturing, government, AEC, and related industries turn to Synergis Engineering Design Solutions for Autodesk software, and the highest quality training, professional services, and support available to ensure their maximum productivity, competitive business advantage, and return on investment. As an Autodesk® Authorized Training Center, Synergis provides onsite customized and classroom training at five convenient locations throughout the Mid-Atlantic region, taught by Autodesk Certified Experts.
