Synergis Engineering Design Solutions Reaches Significant Milestone with its Third Premier Solutions Provider Certification for Exceptional Service and Expertise

This top honor demonstrates the company's elite standing in the top tier of Autodesk's value added reseller channel

Quakertown, PA, March 26, 2008 —The Synergis Engineering Design Solutions Division of Synergis Technologies, Inc. today announced it has earned the coveted Autodesk Premier Solutions Provider (PSP) certification for civil engineering software solutions, an honor reserved only for the highest-achieving and most knowledgeable among the Autodesk value added reseller (VAR) channel. This milestone marks the company's third designation as a coveted Autodesk PSP. Synergis Engineering Design Solutions is one of only a handful of Autodesk VARs that carry the elite PSP status and has reached this significant achievement for expertise in the disciplines of civil engineering, manufacturing, and academic markets.

"A three-peat of Autodesk's PSP certification is an extraordinary achievement which deserves a great deal of fanfare. Synergis is a model of a truly exceptional Autodesk VAR," said Steve Blum, senior vice president of Americas Sales at Autodesk.

"Through customer-focused business practices, Synergis has demonstrated that success is achieved through a deeper understanding of our customers."

To qualify for Autodesk PSP status, Synergis Engineering Design Solutions was required to prove its technical and industry expertise, along with its strong knowledge of customers' business needs. In addition, the company met rigorous

sales, personnel and customer service goals and delivered numerous positive customer references attesting to its consistently high level of expertise, service and commitment to customer success. Further, the high caliber of staff at Synergis Engineering Design Solutions, either graduates of their field or possessing equivalent industry experience, was factored into Autodesk's decision to grant this privileged rank upon them.

"Every year Autodesk raises the bar for its VARs, mandating higher levels of solutions expertise, training and support. Each year we are pleased to be among the VARs who are helping them raise and maintain those higher standards," said Tamara Healy, PE, Synergis director of sales and marketing – AEC division. "What drives our performance and helps us achieve these key certification milestones is knowing that at the end of each day we have helped our customers become more successful by virtue of the expertise, support and training we provide them."

About Synergis Engineering Design Solutions

Synergis' Engineering Design Solutions, an independent division of Synergis Technologies, Inc., is among the most elite of the Autodesk Value Added Resellers for Manufacturing, Infrastructure, and Building Solutions. Synergis Engineering Design Solutions holds privileged recognition as an Autodesk Premier Solutions Provider (PSP), Autodesk's highest level of certification, for the expertise, training and services it provides for the manufacturing, civil engineering and academic communities. Companies in manufacturing, government, AEC, and related industries turn to Synergis Engineering Design Solutions for Autodesk software, and the highest quality training, professional services, and support available to ensure their maximum productivity, competitive business advantage, and return on investment. As an Autodesk Authorized Training Center, Synergis provides onsite customized and classroom training at five convenient locations throughout the Mid-Atlantic region, taught by Autodesk certified experts. For more information on the Engineering Design Solutions Division, visit www.synergis.com or call 800-836-5440.
