## **SYNERGIS TECHNOLOGIES NAMED TOP PLACE TO WORK IN LEHIGH VALLEY**

**February 27, 2014, Quakertown, PA** – [Synergis Technologies, LLC](#), the provider of CAD and Data Management software and services to engineering and design companies throughout North America, announced today that the company has been selected as one of “The Morning Call’s Top Workplaces.”

Synergis Technologies, LLC was founded in 1985 by David B. Sharp III, Janet Kiehart and Bill Stamp, all longtime residents of Quakertown. The company’s now 108 employees have been with the company for 10 years on average, thanks to Synergis’ deep commitment to live by a core set of values that foster: family spirit and unity, innovation, service beyond expectation, an extraordinary workplace environment, personal growth, and giving back to its communities.

“What makes Synergis unique in today’s technology industry is not only the longevity of our stakeholders’ tenure, but the common bond we all share of openness, trust, creativity and passion,” states David Sharp, president and CEO. “Our integrity, loyalty and compassion give us the ability to build deep, long term relationships with our clients, our people, their families and our communities.”

The Top Workplaces award is determined based solely on employee feedback. Of the 108 employees, 90% of Synergis employees responded to the questionnaire. Employees ranked Synergis highest in the area of “connection” and agreed that they “felt genuinely appreciated at the company” and “part of something meaningful.” Stated one respondent, “The thing that impresses me the most is that senior managers take the time to get to know people at all levels of the organization and make them feel welcome as a part of the family.”
