Synergis Continues to Make Investments to Best Serve Customers

QUAKERTOWN, Pennsylvania, August 29, 2012— Synergis Technologies, Inc. today announced changes within the Synergis Engineering Design Solutions division to serve its expanding services offering and growing customer base. Included in these changes are the appointment of Mark Mahovich to oversee the organization’s Information Services (IS) team in addition to his existing responsibility of leading the Synergis Engineering Design Solutions Professional Services organization, the promotion of Jim Law and Jim Swain, two tenured solutions engineers to project manager roles, and the addition of Curt Egli, Bill McKown, Kevin Spear, Nicolette Szymanski, and David Wyer to the Professional Services team.

Synergis continues to enhance its services offering to meet the needs of customers, expanding into new areas and regions. The organization is evolving to ensure customers receive the same value, expertise, and focus that have enabled Synergis to be recognized as an Autodesk Platinum Partner.

“Synergis’ goal is to help our customers stay ahead, and as our customer base continues to grow, we needed to add knowledge experts so that the services and support we deliver continue to exceed expectations,” said Kristen Tomasic, vice president of Synergis Engineering Design Solutions. “Mark has done an outstanding job leading the professional services organization within Synergis Engineering Design Solutions, and his overall expertise in services, coupled with proven leadership and project management skills, make this the ideal role for Mark. As he continues to lead the services group and our corporate IS team, having Jim Law as our project manager for AEC and Jim Swain as our project manager for manufacturing allows us to offer expert services on much larger engagements, maintaining our commitment to customer success and satisfaction.”

Synergis, an Autodesk Platinum Partner, is based in North America. Platinum Tier partners comprise the highest level of the Autodesk [Value Added Reseller](#) (VAR) program, which incorporates Autodesk software solutions along with proven and measurable technical expertise in a specific industry or unique business. In addition, the organization has earned nine Autodesk Specializations, including the designations of Autodesk Consulting Specialization and Autodesk Product Support Specialization, as a result of the investment made in its people, having a solid consulting business plan and reference able customers, and offering a high level of knowledge and customer support.

About Synergis Engineering Design Solutions

Synergis Engineering Design Solutions, a division of Synergis Technologies, Inc., provides customers solutions to make them more productive, competitive, and profitable. Synergis is an Autodesk VAR and holds privileged recognition as an Autodesk Platinum Partner, Autodesk's highest level of certification, for the expertise, training and services it provides for the manufacturing, AEC and education communities; Autodesk Consulting Specialized Partner; and Autodesk Authorized Training Center (ATC). Companies in these industries turn to Synergis for Autodesk software, and the highest quality training, professional services, and support available to help them stay ahead. For more information on Synergis Engineering Design Solutions, visit www.synergis.com or call 800-836-5440.
