

## Kwik Goal Looks to Synergis to Keep Them Up and Running with Autodesk Solutions

### Company Background

Founded over 30 years ago, Kwik Goal, Ltd. manufactures soccer goals, field and training equipment, team seating, as well as accessories for coaches, referees and players at all levels. Headquartered in Quakertown, Kwik Goal occupies a three-building campus consisting of back office, production, shipping, warehousing, and receiving. Kwik Goal, highly regarded for its sporting goods, is a Technical Partner to U.S. Soccer, a Corporate Partner to the U.S. Soccer Foundation, an Official Supplier to the Canadian Soccer Association, and Official Partner to the National Soccer Coaches Association of America (NSCAA).

As a long-time Synergis customer using Autodesk solutions, Kwik Goal relies on the Autodesk Product Design Suite Ultimate, leveraging Autodesk AutoCAD, Autodesk Inventor, Autodesk Mechanical, and Autodesk Showcase.

### The Business Challenge

Kwik Goal needs to stay up to date with the latest software releases. This includes integrating in new products available in the Suites that add efficiency to their workflows, and receiving prompt answers to questions about their CAD tools.

Manufacturing

#### Products Used:

- Autodesk Product Design Suite Ultimate
- Autodesk AutoCAD
- Autodesk Inventor
- Autodesk Mechanical
- Autodesk Showcase

#### Synergis Services Used:

- Training
- Helpdesk Support

*Helping you stay ahead.*

## The Solution

Synergis Engineering Design Solutions Helpdesk support and training has been there for Kwik Goal to keep them up and running. Starting with AutoCAD, Kwik Goal looked to Synergis for training due to the convenience of the Synergis Quakertown Training Center. As the design team began using Mechanical Desktop, and then transitioned to Inventor, further training was needed. With the additional software available in the Autodesk Suites, the team at Kwik Goal is using Showcase to create visuals for the sales team and end-user instructions.

Kwik Goal looks to Synergis Helpdesk experts for ongoing support, prompt answers to questions, and to ensure a smooth transition to the latest software releases.

## The Result

One of the recent successes Kwik Goal had using the tools, training, and support of Synergis is the introduction of a custom shelter line. With varying length, seating, and the ability to add graphics, these customized shelters offer durability, weather protection, and storage. Kwik Goal is able to show customers what the designed shelter will look like based on the specifications. These shelters were used during the New York City Football Club Historic Home Opener at Yankee Stadium.

“Synergis is always there to help us with our Autodesk tools through training, helpdesk and in-person events such as user groups and Synergis University. These are very informative and a great to see how other people are using the software.”

Chris Speck,  
Kwik Goal

# How can Synergis help you stay ahead?

We consider every one of our customers a long-term partner, and our top priority is to find solutions that help your business move forward and stay ahead of the competition. That solution could mean helping you manage licenses and subscriptions, introducing a new product or providing the latest training. Synergis Engineering Design Solutions is an Autodesk Platinum Partner, Autodesk Consulting Specialized Partner and Autodesk Authorized Training Center (ATC).

Contact the team at Synergis today to see how we can help you stay ahead.
